200 East Pine Street
Grove City, Pennsylvania 16127

Dear Hans:

Beverly is totally destroyed by the tyranny of higher education. She was really "had" the other day, but she is fighting mad and fighting back. The enclosed copy of her letter to the academic dean will explain all!

She has vowed to quit and go back to the kitchen -- where we both know she properly belongs -- but I hate to see her quit out of anger and intimidation. Right now she has a rather low opinion of college professors!

Thanks for sending us Hoppe's book. We will return it to you later this spring. The "Personal Finance" is enclosed. I made a copy of it for her. If you receive anything further on S.A. gold stocks, please forward it to me.

I am under the impression that sand and gravel is "bad," but I'm not sure. Should I be extending my condolences to you or my congratulations? If sand and gravel is good, wouldn't coal be better? Anyway, you entrepreneurs have a way of turning losses into profits that is beyond my understanding.

I finished my fourth Argentine lecture which means that I can start living again. Be prepared to write a brief "bio" on the Andersons. I think it is inevitable that Alberto will be asking for it.

Glad to hear you were home for a few days.

Cordially,

RGA/dr
Encl.

Robert G. Anderson

memo from . . .

HANS SENNHOLZ

3/3/79

Bob,

I am enclosing a gold report
in the current issue of Personal
Finance. I need it back.

Under separate cover I am sending
you Donald Hoppe's
How to Invest in Gold Stocks,
which is a 575 page book. If
Beverly needs more I'll ~~see~~ find
more sources.

Without my knowledge Charles
Gusler had his friend, a soil
expert in the U.S. Dept of Agriculture,
analyze my Grove City farm, with

Soil test and aerial photographs
I am in a state of shock about
the results: it's 60 acres of
pure gravel and sand.

And I meant to be a tree farmer!
That's entrepreneurship at its best!

Regards,

Hans

P.S. I shall need the Hayek books.
This week was mid-term ~~exam~~
time; next week I'll be on the
road.
