

Nero in a modern suit

PLENTY OF TIME for television or golf—but none for Civil Defense . . . Send your son to school or camp—but keep him out of service if you can . . . Know baseball scores, football averages by heart—but who cares where or what Cambodia is, or Formosa, or Iran?

Does all the tragic history of Poland, Czechoslovakia, China mean nothing? Once free, self-respecting people; now defeated, enslaved, starved.

Are we next? . . .

“We’ve never been defeated.” “Nobody wants to harm us.” “We’re the greatest power on earth.” And while those comforting tunes lull us to sleep, another ten million people fall under the communist yoke—another ten million enemies.

We are already defeated by numbers—hundreds of millions of numbers. Only American machines and American spirit to use them well can make us match those millions. But we’d better *get* the machines and revive the spirit before it is too late.
