

You can't vote yourself security

THE GERMANS TRIED IT—and lost their nation. The Russians tried it—and made themselves slaves.

You'll notice that security is always offered in return for your vote—"just a vote of confidence, so I can get for you what you want." So the farmer votes for tax-free co-ops or guarantee of profits, the worker votes for a union boss he never saw, the businessman votes for a subsidy or cost-plus government contract.

And for every inch they advance toward

security, they retreat a mile toward regulation that is next to servitude.

But there *is* a way to enjoy security in America (and only in America, by the way). That is, to make yourself something the world must have—a skillful farmer, a productive worker, a sound businessman. In this country it is true that the more value you add to the world and the more you add to the world's goods, the more you will be paid in return. *That* is security with self-respect—the only kind of security Americans want.
