200 East Pine Street  
Grove City, Pennsylvania 16127

Dear Hans:

Thanks for the copy of "Federal Gold Must be Employed Productively." It well may be the most valuable advice the Commission receives -- in the light of prevailing conditions and circumstances. Hopefully, the disposition of resources from Federal ownership and control into private hands might be applied to many other items as well as gold. But this was a special treatment of gold only. So, congratulations.

Much as I admire your handling of this testimony, and thank you for sharing it, I doubt that it would serve equally well as a Freeman article. It's in the realm of political advice and action outside our field.

We'll be curious about the hearing you receive and the discussion your paper may generate.

Sincerely,

Paul L. Poixot
