The Editor
Newsweek

Quick, Watson! - the Needle!

I recommend that Newsweek, as a special service to the public in general and to taxpayers in particular, reprint the article "The Fourth Dimension," by Henry Hazlitt (Nov. 28) in large, flaming red type and send a copy to each National Legislator and to each National Department head with extra copies to those in the Department or Bureau of Budget.

It is probable that most all of the above personages are well aware of the import of the message, but there is also a possibility that they may not know that others are similarly informed.

On occasion, Mr. Hazlitt really hits the nail on the head, doesn't he?

Yours truly,
John Marts, Jr.
